

Cascading HOPE

Jasjot Anand
Cancer Survivor and Educator

Your Invitation to Join **The Leadership Society**

World-class healthcare through philanthropy begins with a promise to lead. Your generous leadership investment will change – and save – lives.

THANK YOU for helping shape the future of this award-winning health system.

For years, Eva and her late husband, Leo, chose to support the Englewood Health Foundation, never anticipating their generosity would one day come full circle. In 2010, routine pre-op testing led to an unexpected diagnosis: Eva had stage-4 cancer. Overwhelmed with fear, they turned to Dr. Nimesh Nagarsheth, whose expertise and compassion offered light in their darkest hour. Days later, Eva underwent complex surgery and today she is cancer-free. Grateful and inspired, Eva and her husband directed a leadership-level gift to support life-saving surgical technology.

Eva Gans
Cancer Survivor and Philanthropist

“ As an Englewood Health surgeon, I am incredibly grateful to generous donors who allow our health system to continue raising the bar on cancer treatment. I see firsthand the incredible impact philanthropy makes in the operating room. It is a reason why I choose to make a commitment myself as a Physician Partner, joining a group of doctors who pledge annual support to the Foundation. Ongoing investments in surgical innovation and robotics significantly enhance my ability to save lives. ”

Nimesh Nagarsheth, MD
Director of Gynecologic Oncology
Director of Robotic Surgery

This is good news for patients throughout the region, including Jasjot Anand. On any other day, Jasjot and Dr. Nagarsheth may have bonded over their shared love of music. But following her stage-3 cancer diagnosis, only one thought consumed her: how much time she had left. Dr. Nagarsheth, with his thorough assessment and unwavering optimism, quickly became her hope personified. Using the latest technology funded by donors like Eva, his confidence in the outcome of surgery and treatment filled Jasjot with renewed strength. This educator is now cancer-free and enormously thankful for a transformative journey that deepened her love of self, family and music.
